## **DETAILED ACTION**

### ***Continued Examination Under 37 CFR 1.114***

1. A request for continued examination under 37 CFR 1.114, including the fee set forth in 37 CFR 1.17(e), was filed in this application after final rejection. Since this application is eligible for continued examination under 37 CFR 1.114, and the fee set forth in 37 CFR 1.17(e) has been timely paid, the finality of the previous Office action has been withdrawn pursuant to 37 CFR 1.114. Applicant's submission filed on August 03, 2004 has been entered.

### ***Claim Rejections - 35 USC § 102***

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by US Patent 5,541,834 to Tomigashi et al.

Tomigashi et al disclose a method of detecting a position of a rotation axis of a suction nozzle (1) of an electric-component mounting apparatus, the suction nozzle holding, by suction, an electric component (11), and being rotated about the rotation axis thereof to rotate the electric component held thereby, so that the electric component rotated is mounted on a component-mounting surface of a circuit substrate, the method comprising the step of: detecting, on a position-detecting plane (pads 17) including the component-mounting surface of the circuit substrate (12), the position of the rotation axis of the suction nozzle (1, Col. 7, lines 6-10),

Art Unit: 3729

wherein the position-detecting plane is co-planar with the component-mounting surface of the circuit substrate (Col. 5, lines 7-12).

*Allowable Subject Matter*

4. Claims 2-4 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 5-12 are allowed.

*Conclusion*

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
